📍 Pune, Maharashtra, India

SKILLS

AI Tools	✳️ Claude Code 🐙 Codex 🖱️ Cursor 🤖 GitHub Copilot
Backend	TypeScript, Node.js, Java, Go, Vert.x, REST APIs, OAuth
Data	PostgreSQL, Cassandra, Apache Kafka, Redis, RabbitMQ, Flyway
Deployment	AWS, Docker, Kubernetes, Git, CI/CD, API Testing, JSON Schema (AJV), JUnit, Mockito

EXPERIENCE

LotusFlare

Pune, India

Backend Software Engineer

Apr 2026 – Present

- 🔹 **Event Processing:** Added schema validation to a Kafka-based backend, reducing malformed-event failures by approximately 40% across 15+ event types.
- 🔹 **Data Consistency:** Fixed incorrect resource links in newly created records, restoring reliable data for 5+ downstream services.
- 🔹 **Release Reliability:** Diagnosed a regression in the automated API test suite, restoring 50+ tests and unblocking the release pipeline.
- 🔹 **Backend Delivery:** Delivered 40+ merged pull requests across backend features and bug fixes for a telecom digital services platform.
- 🔹 **Database Migrations:** Shipped 10+ schema migrations across PostgreSQL and Cassandra with zero production incidents.
- 🔹 **AI-Assisted Testing:** Introduced tooling to auto-generate API tests, cutting setup time for new endpoints by approximately 50%.

Freshworks

Bengaluru, India

Senior Software Engineer – Freshservice Orchestration

Mar 2020 – Apr 2026

- 🔹 **Platform Ownership:** Owned 45+ Java/Vert.x integrations backed by Redis and RabbitMQ on a platform serving 6,058 accounts and processing 1.25B+ cumulative transactions.
- 🔹 **Execution Architecture:** Removed a 29-second synchronous timeout bottleneck by re-architecting long-running requests, reducing end-to-end response time from approximately 3 minutes to under 1 second.
- 🔹 **Service Reliability:** Improved large-JSON processing with Redis caching and RabbitMQ queuing, reducing memory usage; expanded JUnit and Mockito coverage across 9+ connectors.
- 🔹 **API Integrations:** Delivered Zoom, Slack, Dropbox Business, Azure AD, OneLogin, and Smartsheet integrations, identifying USD 50K+ in savings for Freshworks internal IT.
- 🔹 **Customer Collaboration:** Diagnosed 1,000+ production escalations; joined 500+ customer calls and collaborated with engineers and QA across six global regions.
- 🔹 **Security and Mentorship:** Built Active Directory automation with PowerShell/WinRM, remediated SSRF and credential vulnerabilities, supported OAuth migrations, and mentored engineers and QA.

Infiverve Technologies (Flint; acquired by Freshworks)

Pune, India

Software Product Developer

Jun 2018 – Mar 2020

- 🔹 **Workflow Execution Platform:** Built loop, asynchronous-scheduling, and tag-management capabilities in Vert.x, enabling repeated service execution in automated workflows.
- 🔹 **PostgreSQL Multitenancy:** Contributed to a PostgreSQL migration from a multi-schema design to a single-schema multitenant architecture.
- 🔹 **Backend Tooling:** Developed Go utilities for remote command execution and Groovy-based asset automation; remediated static-analysis security findings identified by SpotBugs.

EDUCATION

Bachelor of Engineering in Information Technology, First Class

Pune, India

JSPM's Rajarshi Shahu College of Engineering, Savitribai Phule Pune University

2017
